

AUSTIN, TEXAS.

THURSDAY - - - - - APR. 12, 1883

It is reported that Farnell is coming to America.

EX-UNITED STATES ATTORNEY BURNS, it is said, is after Col. Hayne's place at Brownsville.

TUDOR McCOMAS and wife, recently killed by the Apaches in Arizona were buried at Fort Scott.

A LITTLE girl, but seven years old, the daughter of the Editor, is a regular compositor on the Black Wax.

AND straightway some of his admiring friends are naming Judge Graham as a presidential candidate.

COL. J. M. BUTTIN, of Sherman, and W. T. Haygood, of Jefferson, both want to be state railroad engineers.

It is estimated that the loss in sheep in Texas during the severe cold spells of last winter was three hundred thousand head.

It was asserted in a meeting in Boston the other day that intemperance is making fearful inroads on women as it has done on men.

AND now the Fort Worth Gazette will be issued every day in the week. The management announce the step a necessity to meet public demand.

THE Examiner is of the opinion that conditional pardons are unconstitutional and the STATESMAN is inclined to believe it is correct in this opinion.

THE governor's veto of Senator Gibbs' federal court house bill, though made on legal grounds, was not sustained. The disapproval was unanimous.

CONSUL WILSON, of Nantes, writes that the reason for the prohibition of the importation of American pork into France is a desire to retaliate against the American tariff so far as it affects French goods.

AND now a letter has been dragged to light, written by Ruediger Johnson in 1877 to Brick Pomery, in which it appears that at that time John Johnson was one of the staunchest supporters of Greenbackism in Collin county.

COMMONS, of the Greek statesmen, lived on a salary of \$2000 a year and died possessed of \$400,000. Public men of this country, who accumulate vast wealth in place, would answer in explanation of this mystery that it is all Greek to them.

THE law regulating the disposition of the mineral lands of the state was framed and introduced by Hon. A. W. Houston, the senator from Bexar county, and this gentleman deserves great credit for having originated and carried through this valuable public measure.

THE Examiner is mistaken; the capital syndicate has not acquired title to the capital lands. The company's right to use is acquired, but no fee simple conveyance has been made. Such conveyance will be made when the stipulations of the contract are faithfully executed.

It was fortunate for the state that the increase in the treasurer's bond does not go into effect during the present incumbent's term. Mr. Lubbock had said he would resign if the state is ever to do without his service is not understood.

A SCANDAL concerning the late Mrs. Gotschalk is that he left a mistress, professionally Lina Braun, but who is no other than Jim Fiske's old pet, Josie Mansfield. Lina, or Josie, whoever she is, has begun a suit against the prince's heirs for \$20,000 marks a year, which she claims the prince promised her.

A SCHOOL of pharmacy for women, said to be the only institution of the kind in the country, has been organized at Louisville, Kentucky, under conditions which are thought to be favorable. The school is to be a projected course of study covers two years, each year being divided into two terms, being September 1 and February 15, and containing twenty weeks each.

It is now proposed, in England, to build steam fire engines with separate and disconnected boilers. It is claimed by the builders that two horses cannot haul more machinery upon four wheels than is massed in the present steam fire engines, and that this puts a limit to the increase in power. But by the change suggested the power can be trebled with only double the number of horses.

CERTAINLY the story that the imperial coronation in Russia is a religious cannot be true for that very thing, coupled with the general refusal of royalty to attend, would give it renewed life. The trouble about it is that there really is a little too much life in the restless organization, and the coronation must be a dead affair with the death-like glitter that will surround it.

A REMARKABLE invention is described by the Electrical Review. It is a device for photographing in a telephone exchange all persons using the telephones on wires emanating therefrom. The photograph appears on a ribbon which runs under the eye of the operator. If the person using the instrument is not a subscriber, the fact is at once apparent, and the person in whose office the telephone is located is charged a fixed sum for allowing his name to be recorded and by one not entitled to use it. Each ribbon will hold 250 photographs, and when full will be filed away.

TOUCHING the persistent fallacy that the productive class keep up workingmen's wages, the Louisville Courier-Journal wants to know why the advocates of that system do not say something about the wages paid workingmen in Germany, Russia, Austria and France, where their favorite policy is in full vogue? Why do they not show that their doctrine of the wages paid under protective tariffs in Europe? They say that always makes high wages "easy work." Let them show that their doctrine works in Europe. Go to Germany, Russia, Austria and France, and give your readers the facts.

LEGISLATIVE WORK.

When the work of the eighteenth legislature is summed up it can be truthfully stated that it has in its good work exceeded public expectation. Both senate and house have been hard-working bodies, and, without ruder, they have struggled against many difficulties, and overcoming formidable ones, the legislature has really accomplished what ought to satisfy the people. Some very serious blunders were committed by the legislature in connection with public lands. These have been mainly corrected, and much valuable domain has been reclaimed, that was regarded as lost, without corresponding benefits to the state. It is estimated that in the neighborhood of four millions acres of the public domain, set apart for the legislature at five cents an acre, has been saved, and that in this item alone the state saves over seven millions of dollars. The four million acres of land was on the market at fifty cents an acre, and the revenue derivable under the sale would have been two million, five hundred thousand dollars. With the view of land fixed now at two dollars per acre, the state gains the difference between two million five hundred thousand and ten million dollars. Of these lands the university has been given one million acres and the public free schools a like amount, representing at present valuation two million dollars for the university and the same for the free schools. The valuable timbered lands of the state are to be watched with zealous care, and, while much of these lands passed away from the state under the old law, enough remains to tell handsomely in swelling in time the school fund of the state. The provision for deriving a revenue from the public lands, belonging to the state and to the several endowment funds, is a wise conclusion to a question that has been agitated for years. Under this law it may be expected the mineral resources of the state will be rapidly developed. The long deferred report to the university fund for the year 1882 is also ready for a vote, and by it impetus is to be given to the early successful establishment of a university, which must before long be the pride of every Texan. Not only must this noble act be chronicled of the eighteenth legislature, but its bounty in lands, donated to the use of higher as well as lower education, gives it honorable distinction in the legislative annals of Texas. Such matters are of state-wide importance, but there are by no means all of such importance. The acts will speak for themselves, and the labors performed, both of a general and a special nature, will be chronicled in the pages of the STATESMAN, and even surpass all, when it is borne in mind that everything done was purely of legislative conception. It did not abolish the jury system, nor did it pass a law that anybody in the state shall be inoculated, no, no, no, with all the diseases that the state has, and the result of his active fight against the penitentiary lies? Straws show which way the wind blows. The people will reward their champions in this important matter. Two of the three members of the committee were appointed from adjoining districts.

UNPAID taxes disqualify nearly two-thirds of the 50,000 voters in Rhode Island.

THE colored Methodist Episcopal church has a membership of over one hundred thousand.

SPIRITUALISM claims over two millions of avowed believers in this country—almost converted in thirty-five years.

HARVARD college receives from generous friends in donations an amount ranging annually from \$100,000 to \$250,000.

IT WILL be January 1885 when another session of the legislature meets. The session just closed cost the state nearly \$100,000.

TALMAGE says there is one thing prayer won't do. It won't pay his salary. Mr. Talmage isn't the first man that has discovered this bit of financial philosophy.

MR. TALMAGE says: "A live church will have a live sabbath school. A stupid church with a stupid Sunday school is a dead school holding a dead child."

NOTWITHSTANDING the fact that our navy is now composed exclusively of officers for which the government has not the slightest use in the world, they go on manufacturing empty commodores and admirals.

DURING the eighty-two years that have elapsed since the Union, it is computed that Ireland has been drained of \$2,500,000,000 in the shape of absentee rents, most of which would have been spent at home to fructify trade and commerce if the island possessed a legislature of its own.

HERE Mr. Moore promises to issue a proclamation to the Socialists relative to plans for postponing the car's conversion. This is a country of free speech, but it looks as though some kind of an arrangement ought to be fixed up for getting this dirty fellow into a penitentiary for a long term of years.

AN intimate friend of Senator Edmunds asserts that the acting vice president will not be a candidate for the presidency. It is also said for him that when congress meets next December he will resign as president pro tem of the senate; that his acceptance of the position was only to prevent the naming of another.

SENATOR GIBBS, by reason of his chairmanship of the committee on constitutional amendments, was entitled to be appointed on the committee to prepare the address to the people, and no member of the senate was better qualified to perform the duty. His friends think that his failure to do so, not the appointment was the result of his active fight against the penitentiary lies? Straws show which way the wind blows. The people will reward their champions in this important matter. Two of the three members of the committee were appointed from adjoining districts.

SPEAKER GIBSON has made an enviable record as the presiding officer of the house. The uniform justice of his rulings, and the courtesy with which every member and every element of faction in that body has been treated has greatly popularized him. His ability as a presiding officer is now recognized as second, if not at all, to but few men in any country. His quick perception, his wonderful readiness as a parliamentarian, the remarkable retention of all points surrounding a measure under consideration and his prompt action in the perfecting of a bill, in managing a large deliberative body. Few men combine the faculties necessary for such a presiding officer, and Mr. Gibson appears to possess them all. His selection as speaker was a most fortunate one.

THE trial of six nihilists at St. Petersburg, and of twenty-six at Odessa, is progressing. There seems to be no terror in death to these people. In the single matter of conspiracy and assassination Russia and England stand on the same level. The death appears to have no terrors for the nihilists. Like all things else it is a product of a cause, and that cause cannot be uprooted by destroying its products. Heads may be cut off, but the roots will still flourish and will produce more heads.

THE Bessemer steel makers of the country are now threatened with a new peril. Within a few days a trial of paper rails will be made on a prominent western trunk line, the issue of which will be the right of the Bessemer process. The pulp of which the rails are entirely composed is, by pressure, made as solid as metal and much more durable, while the safety thus obtained is multiplied by atmospheric changes that comprise the main drawback to steel. Besides this, the cost of manufacture is less than that of the Bessemer process. It is a universal adoption in the eyes of the test proves to the expectations of those who have undertaken the matter.

THE governor of Dakota Territory refused to sign a bill passed, providing for a constitutional convention to organize a state out of that portion of the territory south of the forty-sixth parallel. In consequence the people have called a convention to meet at Huron, June 19, to arrange for a regular constitutional convention to be held later. They have no doubt that the boundaries, select a state name, adopt a constitution, and elect senators and representatives, and then demand admittance into the union. This proposed assertion of the right to call and hold a constitutional convention, the legislature having failed to secure an effective vote, is its act, legitimate and unassailable.

HON. SAM CUNIFF, representative of Smith and Gregg counties, has been one of the most attentive and industrious members of the legislature. He has been a faithful and consistent in the performance of his duties, whether on the floor of the house, or as a member of the committee on finance and revenue, and commerce and manufactures, or as the efficient chairman of the committee on claims and accounts. Mr. C. has been a lawyer, and

OUR NEW YORK LETTER.

Monster Hotels in New York and the Distinctive Features of New York News Compiled by Tramp.

[From Our Special Correspondent.]
NEW YORK, April 18, 1883.
New York has near fifty first-class monster hotels, and some of the most prominent of them possess distinctive features and are generally patronized by a class of guests who are not common to any other city.

THE colored Methodist Episcopal church has a membership of over one hundred thousand.

SPIRITUALISM claims over two millions of avowed believers in this country—almost converted in thirty-five years.

OUR WASHINGTON LETTER.

THE Editor of The Statesman:

[From Our Special Correspondent.]
WASHINGTON, April 18, 1883.
The busy counting of the money in the treasury still goes on, and what is more, it is different from anything you will engage the attention of a lay hundred committee for several days. The money is being counted, and the committee is working remarkably fast, but that three weeks more will be required to finish the count, the chairman is reported to say. They have passed the point where errors are possible to be made, and the count is now being made universally correct. All of the current cash which is used in the collection of the money is being counted, and the committee is working remarkably fast, but that three weeks more will be required to finish the count, the chairman is reported to say. They have passed the point where errors are possible to be made, and the count is now being made universally correct. All of the current cash which is used in the collection of the money is being counted, and the committee is working remarkably fast, but that three weeks more will be required to finish the count, the chairman is reported to say. They have passed the point where errors are possible to be made, and the count is now being made universally correct.
